Subject: Table of homes with high metals from the ATSDR and our review using new screening values

---

Humane - Here is the summary table of homes for the high metals (8 homes) primarily for manganese, but also 2 for arsenic and 1 for Aluminum) It does not pull the Lithium data that ATSDR also identified but looking at Rob Helverson's chart that would add the Ex. 6 - Personal Privacy residences with high Lithium, Ex. 6 - Personal Privacy also had high lithium but was listed for other compounds as well.

- our chart

ATSDR Chart:

For the Organics in green also the homes of concern, but we don't know who some are:

Karen D. Johnson, Chief  
Ground Water & Enforcement Branch
